### Norovirus Advice

Norovirus, which causes diarrhoea and vomiting, is one of the most common stomach bugs in the UK. It's also called the winter vomiting bug because it's more common in winter, although you can catch it at any time of the year.

#### How is norovirus spread?

Norovirus spreads very easily in public places such as hospitals, nursing homes and schools.

You can catch it if small particles of vomit or poo from an infected person get into your mouth

A person with norovirus is most infectious from when their symptoms start until 48 hours after all their symptoms have passed, although they may also be infectious for a short time before and after this.

You can get norovirus more than once because the virus is always changing, so your body is unable to build up long-term resistance to it.

#### Preventing norovirus

**Stay off work or school until at least 48 hours after the symptoms have passed.** You should also avoid visiting anyone in hospital during this time.

**Wash your hands** frequently and thoroughly with soap and water, particularly after using the toilet and before preparing food. Don't rely on alcohol hand gels, as they don't kill the virus.
